

LYSAGHT

ACREAGE LIVING

FOR HOMES SHAPED BY SPACE AND SKY

INSPIRATION TO BUILD BETTER

CHARACTERISTICS OF ACREAGE LIVING

Acreage living is the truest expression of Australian life, where open skies, wide verandahs and a sense of freedom define the form. Homes stretch out rather than rise up, breathing with the landscape and taking in every view. Long rooflines and wide verandahs define the form, framing open skies and creating sheltered spaces that bridge indoors and out.

Steel brings structure and confidence to this openness. LYSAGHT® roofing spans large distances with strength and precision, delivering a clean, uncluttered aesthetic that sits naturally within rural settings. Guttering systems manage heavy rainfall and support water harvesting, while cladding extends the design language across barns, sheds, and main residences for a cohesive property look.

Every element works hard to perform in demanding conditions. Manufactured from genuine COLORBOND® steel, LYSAGHT® products resist fire, corrosion, and pests with minimal maintenance. With solar-reflective coatings such as Thermatech®, they also help reduce heat stress and improve comfort year-round. The resulting architecture feels grounded, generous, and distinctly Australian, while being built to last and made to live with the land.

LYSAGHT® & CUSTOM ORB®

HELPING DEFINE AUSTRALIA'S
ARCHITECTURAL STYLE

Acreage homes are shaped by space, proportion and simplicity. Long rooflines and wide verandahs rely on materials that combine strength with style. LYSAGHT® roofing delivers both, from the classic corrugations of CUSTOM ORB® to the refined standing seams of the ZENITH® range.

Made in Australia from genuine COLORBOND® steel and ZINCALUME® steel, it spans wide distances, resists corrosion, fire and pests, and requires little maintenance. Most colours feature Thermatech® solar reflectance technology for year-round comfort. With enduring finishes and performance backed by BlueScope, LYSAGHT® roofing is built to stand strong in Australia's open country.

The innovation that helped shape our country's unique architectural style, CUSTOM ORB® corrugated steel, is part of the fabric of Australia with a legacy of over 150 years.

LYSAGHT – SHAPERS OF COLORBOND® STEEL

COLORBOND® steel is Australian-made pre-painted steel that's supplied to Lysaght in large coils. Lysaght then shapes the COLORBOND® steel (through the process known as rollforming) into our range of roofing and walling products, gutters, fascia and downpipes, fencing systems, plus home improvement products such as verandahs, patios and carports.

Colorbond®

ACREAGE STYLE

Acreage design favours simplicity, proportion and connection to the land. These homes feel spacious yet composed, shaped by generous verandahs, extended rooflines and strong horizontal emphasis. LYSAGHT® profiles complement this balance with clean geometry and enduring finishes that sit naturally within open rural settings.

Colour and texture shape the tone. Neutral shades and Matt finishes settle into the landscape, while deeper hues and Metallic effects add definition and movement. When paired with natural materials like timber or stone, steel introduces contrast without distraction, reinforcing the quiet confidence that defines contemporary acreage style.

Attention to detail defines the style. Roofing, walling and guttering should align in profile and colour to keep the form cohesive. Consistent finishes create clean transitions between the home, verandahs and outbuildings, while precise joints and sharp edges maintain clarity. It's architected for scale, simplicity and life on the land.

CHARACTERISTICS OF ACREAGE HOUSES INCLUDE:

- Expansive single-level layouts that prioritise open-plan living and connection to the outdoors
- Long, low rooflines and wide verandahs that define proportion and provide shelter
- Generous glazing to maximise natural light, views and cross ventilation
- Durable materials such as steel, timber and stone that respond to rural conditions
- Integrated water collection and energy-efficient design suited to off-grid or semi-rural living
- Consistent design language across dwellings, sheds and outbuildings for a cohesive property look
- A focus on simplicity, longevity and harmony with the surrounding landscape

ACREAGE ROOFING & WALLING PROFILES

The LYSAGHT® roofing range includes Acreage-inspired options available in either unpainted or pre-painted COLORBOND® steel finishes to suit every project.

In acreage design, the roof and walling define proportion and presence. Long, continuous rooflines and broad façades rely on materials that deliver both visual balance and performance. Made in Australia from genuine COLORBOND® steel and ZINCALUME® steel, LYSAGHT® roofing and walling provide colourfast, low-maintenance surfaces that withstand Australia's rural conditions, with BlueScope warranties available, subject to eligibility and location.

Select from classic corrugated profiles that echo traditional homesteads, or contemporary standing seams and interlocking panels that bring a refined edge to modern barn and pavilion styles. Horizontal or vertical application shapes the home's rhythm, while matching roof and wall profiles create a unified language across the main dwelling, sheds and outbuildings for a property that feels complete and cohesive.

CUSTOM ORB®
Classic, versatile corrugated roofing or walling.

TRIMDEK®
Versatile rib and pan style roofing or walling.

SPANDEK®
Modern, square-corrugated roofing or walling.

PANELRIB®
Lightly fluted steel wall, soffit, ceiling and eaves lining profile.

KLIP-LOK 700 HI-STRENGTH®
Clip fixed steel roofing or walling for supreme watertightness.

LONGLINE 305®
Tall, slender ribs and broad pans for bold emphasis. Can be tapered to fan across façades.

ENSEAM®
Wide flat pans with a confident rib for a refined, linear look. Concealed fix for uninterrupted surfaces.

IMPERIAL™
Standing seam elegance with the option to curve where the design calls for it.

WALLING ONLY

WEATHERLINE® (QLD Only)
Lightweight, weatherboard style steel wall cladding.

DOMINION®
Interlocking panel style steel walling featuring recessed joints.

COMPLETE THE LOOK

Bring cohesion to acreage design with detailing that complements the roof and wall lines. Choose quad or square gutters with matching downpipes and accessories in coordinating colours to maintain clean edges and visual consistency. Keep verandahs and eaves refined with the NOVALINE® fascia system or fascia cover, or opt for RANCELINE® or SHORELINE® for a contemporary profile. Finish with purpose-made flashings, cappings and trims to ensure every corner reads sharp, every junction aligns, and the overall composition feels resolved.

ACREAGE COLOUR

Colour defines how an acreage home settles into its surroundings. Soft neutrals blend seamlessly with the landscape and enhance a sense of calm. Warm, natural tones echo the earth and create a feeling of comfort. Deeper hues anchor large façades and highlight the clean geometry of steel. When combined with timber, stone or concrete, colour adds balance, depth and authenticity to rural design.

To create cohesive acreage schemes, LYSAGHT® offers COLORBOND® steel finishes designed to perform in Australia's light and climate.

- Matt colours: low-sheen finishes that soften form and diffuse glare.
- Metallic finishes: subtle shimmer that shifts with light and perspective.

WHY LYSAGHT ONLY USES AUSTRALIAN COLORBOND® STEEL

COLORBOND® steel has been made in Australia since 1966 by BlueScope – Australia's largest steelmaker and a global leader in the manufacture of pre-painted steel.

Decades of Australian research and development have gone into creating a range of technologies that give genuine COLORBOND® steel its long lasting performance in Australia's harsh climate.

Renowned for its quality finish and durability, and backed by a material warranty¹ from BlueScope, COLORBOND® steel is one of Australia's most trusted building materials.

SUSTAINABILITY

At Lysaght, we manufacture our LYSAGHT® steel building products range from 100% Australian-made metallic coated and pre-painted steel. These ingredient steel products are durable and resilient to Australia's harsh climate and their long life helps conserve resources and energy that may otherwise be invested in products with a shorter life span.

All LYSAGHT® steel building products contain recycled content and the steel in LYSAGHT® products is 100% recyclable. In some cases it can be reused without reprocessing, again saving on energy and resource use.

THERMAL EFFICIENCY

Many people know that the colour of your roof can make a difference to your cooling bill and no less than five of the colours in the COLORBOND® steel range qualify as solar reflective (light coloured) roofing under the Green Star Communities tool. But there's another way that COLORBOND® steel can help make your home more energy efficient. Every colour (except Night Sky®) in the standard COLORBOND® steel range features Thermatech® solar reflectance technology. Thermatech® technology is designed to reflect more of the sun's heat on hot, sunny days, which can mean less dependence on air-conditioning, plus reduced heat stress for your roof. The LYSAGHT® product range is available in the full range of COLORBOND® steel colours.

CORSTRIP® PROTECTIVE PLASTIC FILM

Some LYSAGHT® products shaped from COLORBOND® steel are delivered with a plastic film called CORSTRIP® to protect the product from damage during transport and installation. CORSTRIP® is made from 100% low-density polyethylene (LDPE) and is suitable for recycling.
