

LYSAGHT

CONTEMPORARY STYLE

MINIMAL AND SOPHISTICATED

INSPIRATION TO BUILD BETTER

CHARACTERISTICS OF CONTEMPORARY HOUSES

Contemporary architectural style is a fluid design paradigm anchored in the present moment. Unlike some other architectural styles which may refer to a defined geographic anchor or specific historical era, contemporary is ever-changing, reflecting current trends and societal values. It embraces a blend of textures, materials, and technologies, often prioritising sustainability and open spaces. With clean lines, expansive windows, and adaptive designs, it captures the essence of our era, ensuring relevance and resonance with today's dynamic lifestyles.

LYSAGHT® & CUSTOM ORB®

HELPING DEFINE AUSTRALIA'S
ARCHITECTURAL STYLE

Lysaght products have shaped Australian architecture for over 150 years with its famous corrugated steel sheets playing a major role in the design of our homes. This product, now known as CUSTOM ORB®, has been used on many classic Australian structures, from homesteads and stables, to the outdoor dunny and our iconic water tanks.

Loved by architects for its versatility, CUSTOM ORB® corrugated cladding complements any contemporary design with its clean lines and classic shape.

Most importantly, all LYSAGHT® products are manufactured in Australia and are exclusively made from COLORBOND® steel and ZINCALUME® steel, so you know the products are tested and proven in Australian conditions.

LYSAGHT – SHAPERS OF COLORBOND® STEEL

COLORBOND® steel is Australian-made pre-painted steel that's supplied to Lysaght in large coils. Lysaght then shapes the COLORBOND® steel (through the process known as rollforming) into our range of roofing and walling products, gutters, fascia and downpipes, fencing systems, plus home improvement products such as verandahs, patios and carports.

The innovation that helped shape our country's unique architectural style, CUSTOM ORB® corrugated steel, is part of the fabric of Australia with a legacy of over 150 years.

Colorbond®

CONTEMPORARY STYLE

Drawing on the best of the past as well as the latest innovations, it is at once classic and forward thinking. Somewhere between the minimalism of the 90's and the highly decorative styles of the early 20th century, the contemporary look is both unfussy and relaxed with an overarching sense of style. Simple geometric designs are often paired with organic shapes replicating nature.

The Contemporary architectural style blends the best from the past with today's innovations and trends, capturing the essence of modern living. It's a simple and unfussy approach, combining straight lines and natural shapes to craft peaceful and stylish spaces.

Big windows are a hallmark, letting in abundant light and seamlessly connecting the indoors with the world outside. As with any style of architecture, contemporary design reflects the way we want to live now by creating comfortable homes that resonate with our present-day values and environment.

CHARACTERISTICS OF AUSTRALIAN CONTEMPORARY STYLE HOUSES INCLUDE:

- Simple, clean lines, either curved or straight, or a mix of both
- Open floor plans, often with integrated outdoor living space
- Large windows to let in natural light and high ceilings to give a greater sense of space
- A mix of textures and natural materials such as timber, stone, and metal
- Neutral palettes spiced up with occasional pops of colour

CONTEMPORARY ROOFING & WALLING PROFILES

The LYSAGHT® roofing range includes Contemporary-inspired options available in either unpainted or pre-painted COLORBOND® steel finishes to suit every project.

CUSTOM ORB®

Classic, versatile corrugated roofing or walling.

TRIMDEK®

Versatile rib and pan style roofing or walling.

SPANDEK®

Modern, square-corrugated roofing or walling.

PANELRIB®

Lightly fluted steel wall, soffit, ceiling and eaves lining profile.

KLIP-LOK 700 HI-STRENGTH®

Clip fixed steel roofing or walling for supreme watertightness.

KLIP-LOK 700 CLASSIC®

Clip fixed steel roofing or walling for supreme watertightness.

WALLING ONLY

DOMINION®

Interlocking panel style steel walling featuring recessed joints.

ROOFING AND WALLING

LONGLINE 305®

Steel roofing or walling featuring tall, slender ribs and broad, flat pans.

IMPERIAL™

High performance standing seam roofing or walling, capable of curving.

ENSEAM®

Nailstrip-style roofing or walling featuring a striking linear aesthetic.

SNAPSEAM®

Clip-fixed nailstrip-style steel roofing or walling featuring a clean linear appearance.

COMPLETE THE LOOK

Lysaght supplies a large range of traditional style rainwater goods including gutters, downpipes and rainheads specifically suited to Contemporary projects. These products are important details that will either need to blend in or contrast to your roofing or brickwork. LYSAGHT® rainwater goods are available in either a range of pre-painted COLORBOND® steel finishes or unpainted to allow you to create your own unique styling. Teamed with our range of period style vents they will complete the authentic look of your Contemporary style home.

COLOUR THE CONTEMPORARY WAY

A mix of soft grey and beige, 'greige' is a versatile neutral colour palette for contemporary architecture.

COLORBOND® steel's 'greige' colour range including Surfmist®, Dune® and Gully®, delivers calming and sophisticated tones, gently leaning towards nature for inspiration, making it the perfect partner for materials like timber and stone. Accent colours such as terracotta, eucalyptus or olive green and deep charcoal keep this style grounded.

Go Bold – Stand out and make a statement with Monument®, Dover White™, Basalt® and Surfmist®

Be Subtle – Blend in with your natural surroundings with Dune®, Shale Grey®, Gully® and Southerly®

WHY LYSAGHT ONLY USES AUSTRALIAN COLORBOND® STEEL

COLORBOND® steel has been made in Australia since 1966 by BlueScope – Australia’s largest steelmaker and a global leader in the manufacture of pre-painted steel.

Decades of Australian research and development have gone into creating a range of technologies that give genuine COLORBOND® steel its long lasting performance in Australia’s harsh climate.

Renowned for its quality finish and durability, and backed by a material warranty¹ from BlueScope, COLORBOND® steel is one of Australia’s most trusted building materials.

Colorbond®

SUSTAINABILITY

At Lysaght, we manufacture our LYSAGHT® steel building products range from 100% Australian-made metallic coated and pre-painted steel. These ingredient steel products are durable and resilient to Australia’s harsh climate and their long life helps conserve resources and energy that may otherwise be invested in products with a shorter life span.

All LYSAGHT® steel building products contain recycled content and the steel in LYSAGHT® products is 100% recyclable. In some cases it can be reused without reprocessing, again saving on energy and resource use.

THERMAL EFFICIENCY

Many people know that the colour of your roof can make a difference to your cooling bill and no less than five of the colours in the COLORBOND® steel range qualify as solar reflective (light coloured) roofing under the Green Star Communities tool. But there’s another way that COLORBOND® steel can help make your home more energy efficient. Every colour (except Night Sky®) in the standard COLORBOND® steel range features Thermatech® solar reflectance technology. Thermatech® technology is designed to reflect more of the sun’s heat on hot, sunny days, which can mean less dependence on air-conditioning, plus reduced heat stress for your roof. The LYSAGHT® product range is available in the full range of COLORBOND® steel colours.

CORSTRIP® PROTECTIVE PLASTIC FILM

Some LYSAGHT® products shaped from COLORBOND® steel are delivered with a plastic film called CORSTRIP® to protect the product from damage during transport and installation. CORSTRIP® is made from 100% low-density polyethylene (LDPE) and is suitable for recycling.
