LYSAGHT

FARMHOUSE LIVING

PRACTICALITY SHAPED BY CLIMATE, TERRAIN AND LIFESTYLE

INSPIRATION TO BUILD BETTER

CHARACTERISTICS OF FARMHOUSE LIVING

The traditional Australian farm homestead occupies an enduring place in the national psyche. Practical, yet homely. Large, spacious and built to deal with the extremes of the local climate and stand proudly in the face of constant change.

These days they represent a re-connection with nature, a space to grow and enjoy the life-affirming benefits of the traditional Australian lifestyle, coupled with today's technological advancements.

Steel offers the longevity, adaptability and contemporary design expression required to achieve the perfect balance. LYSAGHT® roof and wall cladding profiles allow the truest expression of modern farmhouse living, delivering design and functionality in a way that performs in harsh Australian conditions.

LYSAGHT® & CUSTOM ORB®

HELPING DEFINE AUSTRALIA'S ARCHITECTURAL STYLE

The innovation that helped shape our country's unique architectural style, CUSTOM ORB® corrugated steel, is part of the fabric of Australia with a legacy of over 150 years.

Farmhouses are shaped by space, proportion and practicality. From homesteads to stables, to the outdoor dunny and our iconic water tanks, Australian farmers have trusted our corrugated steel to protect themselves, their livestock and produce for over 150 years.

Rural rooflines, expansive al fresco areas and vehicle ports rely on materials that combine strength with style.

CUSTOM ORB® corrugated cladding complements any Farmhouse design with its clean lines and classic shape. Most importantly, all LYSAGHT® products are manufactured in Australia and are exclusively made from COLORBOND® steel and ZINCALUME® steel, so you know the products are tested and proven in Australian conditions.

LYSAGHT – SHAPERS OF COLORBOND® STEEL

COLORBOND® steel is Australian-made pre-painted steel that's supplied to Lysaght in large coils. Lysaght then shapes the COLORBOND® steel (through the process known as rollforming) into our range of roofing and walling products, gutters, fascia and downpipes, fencing systems, plus home improvement products such as verandahs, patios and carports.

Colorbond®

FARMHOUSE STYLE

The modern farmhouse has evolved into a space to experiment with design, specifically the seamless blend of old and new. Contemporary living that honours its rich heritage.

Beyond family living, many farmhouses are designed for flexible use, such as short-stay accommodation and hosting events. Which is why simplicity and functionality are key drivers in the practical world of farmhouse living.

Farmhouses are known to be more exposed to hazards and extreme climate conditions, such as bushfires, heavy rainfall and drought conditions.

LYSAGHT® steel building products have built-in resilience to meet the unique demands of Australia's harsh and constantly changing environment, making them the ideal solution for the modern farmhouse.

CHARACTERISTICS OF FARMHOUSES INCLUDE:

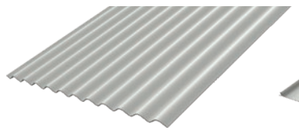

- Expansive single-level layouts that prioritise open-plan living and connection to the outdoors
- Long, low rooflines and wide verandahs that define proportion and provide shelter
- Generous glazing to maximise natural light, views and cross ventilation
- Durable materials such as steel, timber and stone that respond to rural conditions
- Integrated water collection and energy-efficient design suited to off-grid or semi-rural living
- Consistent design language across dwellings, sheds and outbuildings for a cohesive property look
- A focus on simplicity, longevity and harmony with the surrounding landscape.

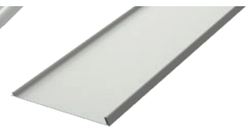

FARMHOUSE ROOFING & WALLING PROFILES

The LYSAGHT® roofing and walling range includes farmhouse-inspired options available in either unpainted or pre-painted COLORBOND® steel finishes to suit any project.

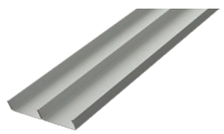

ROOFING AND WALLING

CUSTOM ORB®
Classic, versatile corrugated roofing or walling.

ENSEAM®
Nailstrip-style roofing or walling featuring a striking linear aesthetic.

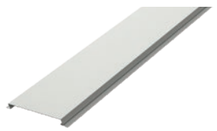

LONGLINE 305®
Steel roofing or walling featuring tall, slender ribs and broad, flat pans.

TRIMDEK®
Versatile rib and pan style roofing or walling.

WALLING ONLY

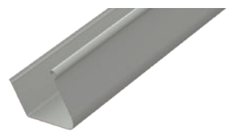

DOMINION®
Interlocking panel style steel walling featuring recessed joints.

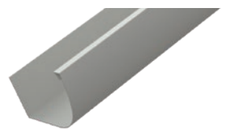

COMPLETE THE FARMHOUSE LOOK

LYSAGHT® supplies a large selection of traditional-style rainwater goods, including gutters, downpipes and rain heads that complement timeless rural homes. These products are important details that will either need to blend in with or contrast to your roofing or brickwork. LYSAGHT® rainwater goods are available either in a range of pre-painted COLORBOND® steel finishes or unpainted to allow you to create your own unique farmhouse styling.

COLOUR THE FARMHOUSE WAY

Colour defines how a farmhouse blends into its surroundings. COLORBOND® steel's colour range of soft neutrals reflect the farming landscape and enhance a sense of calm. Warm, natural tones echo the earth and create a feeling of comfort.

Contrasted with heavy accents or combined with timber, stone or concrete, these agriculturally-inspired colours add balance, depth and authenticity to rural design.

WHY LYSAGHT ONLY USES AUSTRALIAN COLORBOND® STEEL

COLORBOND® steel has been made in Australia since 1966 by BlueScope – Australia's largest steelmaker and a global leader in the manufacture of pre-painted steel.
Decades of Australian research and development have gone into creating a range of technologies that give genuine COLORBOND® steel its long lasting performance in Australia's harsh climate.
Renowned for its quality finish and durability, and backed by a material warranty[1] from BlueScope, COLORBOND® steel is one of Australia's most trusted building materials.

Colorbond®

SUSTAINABILITY

At Lysaght, we manufacture our LYSAGHT® steel building products range from 100% Australian-made metallic coated and pre-painted steel. These ingredient steel products are durable and resilient to Australia's harsh climate and their long life helps conserve resources and energy that may otherwise be invested in products with a shorter life span.

All LYSAGHT® steel building products contain recycled content and the steel in LYSAGHT® products is 100% recyclable. In some cases it can be reused without reprocessing, again saving on energy and resource use.

THERMAL EFFICIENCY

Many people know that the colour of your roof can make a difference to your cooling bill and no less than five of the colours in the COLORBOND® steel range qualify as solar reflective (light coloured) roofing under the Green Star Communities tool. But there's another way that COLORBOND® steel can help make your home more energy efficient. Every colour (except Night Sky®) in the standard COLORBOND® steel range features Thermatech® solar reflectance technology. Thermatech® technology is designed to reflect more of the sun's heat on hot, sunny days, which can mean less dependence on air-conditioning, plus reduced heat stress for your roof. The LYSAGHT® product range is available in the full range of COLORBOND® steel colours.

CORSTRIP® PROTECTIVE PLASTIC FILM

Some LYSAGHT® products shaped from COLORBOND® steel are delivered with a plastic film called CORSTRIP® to protect the product from damage during transport and installation. CORSTRIP® is made from 100% low-density polyethylene (LDPE) and is suitable for recycling.
