# MODERN STEEL EXTERIORS

ELEVATE THE EVERYDAY

INSPIRATION TO BUILD BETTER

# CHARACTERISTICS OF AUSTRALIAN FAÇADES

First impressions land fast. A façade with clean lines, tight joints and long, uninterrupted runs reads modern and well-made. LYSAGHT® walling makes that clarity easy, with linear profiles that carve strong silhouettes and cast confident shadow lines. Run it vertically to lift the form or horizontally to settle it, and pair confidently with timber, brick, render or concrete for warmth and texture.

Performance matters as much as looks. LYSAGHT® walling is engineered to resist weathering, fading, pests and warping with minimal upkeep, so façades stay sharp year after year. Orientation, shading and colour choice support thermal comfort, and most colours in the LYSAGHT® walling range incorporate solar-reflectance technology such as Thermatech® to help reflect more of the sun's heat and reduce cooling demand. The result is a home that looks refined from the street and feels comfortable inside.

# LYSAGHT® WALLING

SHAPING AUSTRALIAN HOMES

Steel façades make the first impression. Linear profiles, sharp edges and clean joints create a crisp, modern face to the street with strong shadow lines. From refined standing seams to interlocking panels and classic corrugations, LYSAGHT® walling profiles are made in Australia from proven materials including genuine COLORBOND® steel and ZINCALUME® steel, delivering a consistent finish across elevations, corners, soffits and interiors.

The advantage goes beyond looks. LYSAGHT® walling resists weather, fading, pests and warping, so the façade stays sharp with minimal upkeep. Unlike many fibre cement systems that can require repainting, patching and seasonal maintenance, steel offers a simpler path to long-term presentation. Specialist options cover coastal and over-water locations, and BlueScope material warranties are available, subject to eligibility and location.

The innovation that helped shape our country's unique architectural style, CUSTOM ORB® corrugated steel, is part of the fabric of Australia with a legacy of over 150 years.

## LYSAGHT – SHAPERS OF COLORBOND® STEEL

COLORBOND® steel is Australian-made and pre-painted for durability. Lysaght rollforms this material into a family of walling profiles, façade systems and complementary rainwater goods, with precision manufacturing that keeps joints tight and lines true. A considered colour palette, including Matt and Metallic finishes, supports everything from calm, neutral schemes to bold, light-catching statements.

Colorbond®

# STEEL STYLE

Modern homes are embracing the beauty and strength of steel façades - a design trend that combines architectural sophistication with lasting practicality. Whether for a new build, renovation, or exterior refresh, LYSAGHT® steel walling delivers a bold, contemporary finish built to endure.

## KEY CHARACTERISTICS OF LYSAGHT® WALLING

Crafted from COLORBOND® steel, LYSAGHT® walling blends timeless style with modern performance. Engineered for Australian conditions, it offers durability, energy efficiency, and sustainability - all while enhancing visual appeal and design flexibility.

From street front to outdoor room, LYSAGHT® walling creates crisp lines, tight joints and confident shadow play that lift first impressions. Use it across façades or as a feature wall or entry blade, pairing easily with timber, brick, render or concrete for a balanced, contemporary look.

- Clean lines and modern finishes add a distinctive architectural edge to a wide range of home styles.
- Fire-resistant, termite-proof steel ensures lasting strength and protection in all weather conditions.
- The low-maintenance finish won't peel, crack, or warp, maintaining a fresh appearance with minimal upkeep.
- COLORBOND® steel featuring Thermatech® technology reflects radiant heat for improved year-round comfort.
- Each LYSAGHT® walling product is made from 100% recyclable steel with recycled content, supporting more sustainable home design.

# RESIDENTIAL WALLING PROFILES

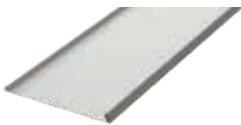

Whether your architectural preference is contemporary or rooted in tradition, the breadth and depth of LYSAGHT® walling products, available in a contemporary range of colours, finishes and substrates, ensures that every design aspiration is attainable.

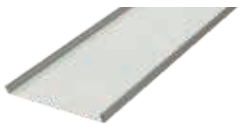

## WALLING STYLES

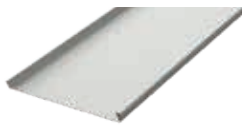

**LONGLINE 305®**  
Tall, slender ribs and broad pans for bold emphasis. Can be tapered to fan across façades.

**ENSEAM®**  
Wide flat pans with a confident rib for a refined, linear look. Concealed fix for uninterrupted surfaces.

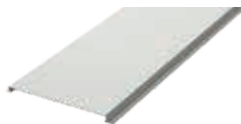

**SNAPSEAM™**  
Clip-fixed nailstrip style that delivers long, straight runs and sharp detailing.

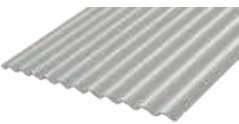

**IMPERIAL™**  
Standing seam elegance with the option to curve where the design calls for it.

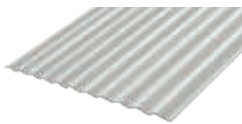

**BAROQUE™**  
Heritage-inspired steel roofing or walling featuring a rounded rib form.

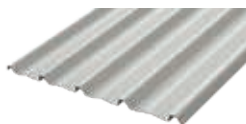

**DOMINION®**  
Interlocking panel-style steel walling featuring recessed joints.

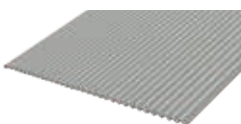

**CUSTOM ORB®**  
The classic corrugated profile for a timeless Australian ripple.

**WALLCLAD™**  
Lightweight, classic corrugated steel walling.

**TRIMWALL®**  
An attractive and lightweight walling profile designed for domestic, rural and commercial applications.

**MINI ORB®**  
Mini-corrugated sheeting for accent cladding.

**MULTICLAD®**  
An attractive trapezoidal multi-ribbed steel walling profile.

**WEATHERLINE® (QLD Only)**  
Lightweight, weatherboard style steel wall cladding.

## COMPLETE THE LOOK

Finish the façade with detailing that complements the walling lines and extends seamlessly across the roof. A cohesive steel roofing selection enhances the visual flow and strengthens the overall architectural form. Select quad or square gutters with matching downpipes and accessories in the walling colour to keep edges clean and the building envelope protected. Keep eaves crisp with the NOVALINE® fascia system or fascia cover, or choose SHEERLINE® or TRIMLINE® for a modern edge.

# RESIDENTIAL COLOUR

Colour sets the mood of a home, and the walling carries it across every elevation. Light neutrals feel open and calm. Warm earth tones add softness and warmth. Deep charcoals sharpen lines and create contrast. Pair steel walling with timber, brick, render or concrete to balance texture and tone across façades, entries and outdoor rooms.

To create a cohesive residential scheme, Lysaght offers COLORBOND® steel walling finishes:

- **Matt colours:** subtle, low-sheen tones for a soft, designer look.
- **Metallic finishes:** refined lustre that plays with light on articulated façades.

SA = 0.64. BCA = D

## WHY LYSAGHT ONLY USES AUSTRALIAN COLORBOND® STEEL

COLORBOND® steel has been made in Australia since 1966 by BlueScope, Australia's largest steelmaker.

Decades of Australian research and development have gone into creating a range of technologies that give genuine COLORBOND® steel its long-lasting performance in Australia's harsh climate.

### SUSTAINABILITY

LYSAGHT® steel products are made from 100% Australian-made metallic-coated and pre-painted steel.

All LYSAGHT® steel products contain recycled content and are 100% recyclable.

### THERMAL EFFICIENCY

Many colours in the COLORBOND® steel range qualify as solar reflective roofing under the Green Star Communities tool.

Thermatech® technology reflects more of the sun's heat, which can mean less dependence on air-conditioning.

### CORSTRIP® PROTECTIVE PLASTIC FILM

Some LYSAGHT® products shaped from COLORBOND® steel are delivered with a plastic film called CORSTRIP® to protect the product from damage during transport and installation. CORSTRIP® is made from 100% low-density polyethylene (LDPE) and is suitable for recycling.
